## OGDEN IS FAVORABLY DESCRIBED IN A NEW FOLDER

Under the title, "Wayside Notes Eastbound Along the Ogden Route," the Southern Pacific railroad has issued a handsome new folder, copies of which have been received by Commercial Agent M. D. Shortz, at the Ogden uptown ticket office of the company. The folder contains nearly 100 pictures and descriptions of points of interest to tourists or home-seekers, between San Francisco and Ogden, and devotes nearly a page to this city, the eastern terminus of the Southern Pacific.

On this page, the following enticement to tourists to stop over in Ogden is given, with pictures of the Hermitage in Ogden canyon, the Union depot and Washington avenue, looking south from Twenty-fourth street.

Ogden, Utah—Altitude, 4,284. Population, 42,000. From San Francisco, 782 miles. Ogden is situated at the base of the western slope of the Wasatch mountains, the rugged and beautiful range extending north and south. It is the eastern terminus of the Southern Pacific which here connects with the Union Pacific railroad to Denver and Kansas City as well as Omaha; the Denver & Rio Grande railway from Denver, through Salt Lake City, and the Oregon Short Line from the latter point, thirty-six miles south. A branch of the Oregon Short Line runs north to Yellowstone Station, entrance to Yellowstone park, a night's ride from Ogden. Stopover at the latter point is allowed on all classes of tickets during season, June 15 to September 15, to permit passengers to visit the park. Butte, the great silver and copper camp, Anaconda, with its smelters, and Helena, the capital of Montana, are but a few hours' ride to the north.

Ogden is a prosperous and well-built city, with good hotels, fine churches and schools, attractive parks, well-paved and tree-shaded streets, as well as mills, factories and canneries.

The Weber river, flowing from the east through Weber canyon, and the Ogden and Bear rivers from the north, irrigate a wide contiguous agricultural and fruit-growing district affording opportunities for the skilled farmer, dairyman and stock breeder. The products embrace all the cereals, tomatoes, sugar-beets, potatoes and other vegetables; apples, pears, peaches, plums, prunes, apricots and cherries.

Visitors to Ogden may take a short and delightful trip by electric line or by auto over a smooth mountain boulevard seven miles through Ogden canyon. The way winds through a narrow rockbound pass, showing strange geological formations and charming vistas of timbered steep slopes and towering columns. Summer cottages appear invitingly among the pines that overlook the rushing trout stream below and the trip ends at the Hermitage—a rustic and picturesque mountain hotel, where luncheon or dinner can be had and return to Ogden made within three hours. The round-trip fare by electric car is 25c.

The announcement last night of the explosion on the Benedetto Brin did not make it clear whether the vessel had gone down. It was said eight officers and 373 marines had been saved. Something over 300 men still are unaccounted for.

The people thought the boss was a very liberal man but it was with their money. See "The District Attorney" tonight and tomorrow at the Ogden Theater.

No wonder the grafters had so much easy money to spend, but "The District Attorney" exposed their game. Tonight and tomorrow at the Ogden Theater.

## REGISTRATION DAYS AND PLACES OF REGISTRATION

Registration days for the city primary election, October 19, and the regular election November 2, are October 5, 12 and 26. The first named election is held for the nomination of candidates for mayor, four-year commissioner, city auditor and municipal judge.

It will be necessary for every person who votes at either election to have his name on the registration list of the district in which he lives and desires to vote. The registration offices will be open all day on the days designated for registering. Registration can be made only on the days provided by law, but transfers from one district to another may be made on any day prior to the days of the two elections.

Following is the complete list of registration officers and the places where registration may be made.

## MANY SHIPS GO TO ARCHANGEL

Steamers Heavily Loaded With Supplies for the Russian Army.

New York, Sept. 29.—Owing to expectation that Archangel will be blockaded with ice within a few weeks, arrangements are being made here for the departure for that port of a large number of steamers heavily loaded with supplies for the Russian army. Twelve of the steamers will leave within three weeks.

Representatives of the Russian government here say many vessels now in the New York-Archangel service will be diverted to the Panama canal route to Vladivostok as soon as it becomes impracticable to send goods to the White sea port.

## ALLIES ON EVE OF GREAT MOVE

Landing of Troops at Macedonia Means Beginning of March on Berlin.

Athens, Sept. 29, via Paris, 10:30 a. m.—"I believe we are on the eve of the most important operation of the war, namely the landing of troops in Macedonia to begin the march, not so much on Constantinople as on Berlin," said an officer attached to the general staff of the British army, on the Gallipoli peninsula, who has come to Athens from the Dardanelles front. "The two offensive forces are gradually closing in. The Mesopotamia expedition is approaching nearer Baghdad and from the Suva-Bah-Cabatepe line an attack on Constantinople may begin at any moment."

## Thomas Jefferson "Father of the Declaration of Independence"

THIS noble founder of the Democratic Party immortalized himself by writing our Declaration of Independence—the document which laid the foundations of Free Government, not only for our own beloved land, but for all the world. His countrymen twice elected him President and will always treasure his memory. Jefferson was the most ardent advocate of Universal Freedom of his time and it was his wisdom and foresight which brought about the Louisiana Purchase. Every drop of his Virginia blood loved Liberty, and because he wanted Americans to be assured of it for all time he championed with all his might and main the signing of the Constitution of the United States. None of the fathers of the Republic were more far-seeing than he and none knew better than he that a mild brew of barley-malt and hops is truly a temperance drink. Hence, in 1816, he wrote President Madison: "A Captain Miller is about to settle in this country and establish a brewery. I wish to see this beverage become common." Jefferson lived past his 83rd year and all his life he was a moderate user of light wines and barley brews. It is unimaginable that were he alive to-day he would vote otherwise than NO to proposed tyrannous prohibition laws. For 58 years Anheuser-Busch have been brewing the kind of honest barley and hop brews which Jefferson hoped in his day to see the National beverage of Americans. Exactly such a beer is BUDWEISER, its quality, purity, mildness and exquisite flavor have won its way to the top. To-day 7500 people are daily required to meet the public demand. Its sales exceed any other beer by millions of bottles.

## MACHINISTS ARE SENT TO EUROPE

American Experts Receive Highest Wages Known at Munition Plants.

New York, Sept. 29.—At least 150 American machinists engaged in all parts of the country are leaving New York each week to work in the munition plants of the European belligerents, according to information obtained at the offices of the International Association of Machinists here. The competition of Great Britain and Russia in employing American machinists is said to have driven the wages of such mechanics to the highest point yet known.

English works, it was stated today, are paying from \$25 to \$35 a week to mechanics. American manufacturers of war munitions for the allies are said to be paying as high as \$7 or \$8 a day.

## AMERICAN INDIAN SOCIETY MEETING

Unveiling of Marker to Memory of Wyandotte Indian Governor of Kansas Feature of Conference.

Lawrence, Kansas, Sept. 29.—Delegates to the conference of the Society of American Indians in session here, left for Kansas City, Kansas, today to participate in the unveiling of a marker to the memory of William Walker, a Wyandotte Indian, first territorial governor of Kansas. After the services the delegates were to return here for participation in sessions of the conference which last the remainder of the week.

The principal aims of the society around which much of the discussion of the conference will center, is embodied in what is known as "the Denver platform." The salient part of this platform, adopted at the conference today was devoted to rural schools. The morning program included addresses by W. H. Campbell of Clark, Neb., chairman of the educational committee; Dr. A. O. Thomas, Nebraska state superintendent; Dr. A. E. Winslow, Boston, Mass.; A. P. Saunders, Columbus, O., and others. The late afternoon program was given over to the women delegates. Mrs. Belle V. D. Harbert of Manzanola, Colo., president of the International Congress of Farm Women, being scheduled to speak on problems confronting that organization; Mrs. H. L. Keef of Walthill, Neb., president of the Federated Women's clubs of Nebraska, following, and Mrs. Ada Carroll Wortman talking on "Social Life on the Farm."

## Take Lime for Tuberculosis

In the Journal of the American Medical Association (July 27, 1912, Page 308), Dr. C. F. Dison, of Minneapolis, holds that a "deficiency of calcium" (lime) is responsible for the physical conditions which lead to tuberculosis, "and the therapy he advocates rests on this basis."

One of the reasons for the widespread success of Eckman's Alternative in the treatment of tuberculosis is its ability to supply this deficiency. It contains a lime salt in such combination with other valuable agents as to be easily assimilated by the average person. Many cases seem to have yielded to it.

## Eckman's Alternative

We make no exaggerated claims for it, but prefer that it be tried on the same basis as any other prescription, and since it contains no opiates, narcotics or habit-forming drugs, it is safe. From your druggist or direct from Eckman Laboratory, Philadelphia.
